

Projection

Module `vec3`

Classes

Class `vec3`

```
class vec3
```

Container for 3D vectors

Class variables

Variable `x` Type: float

X coordinate

Variable `y` Type: float

Y coordinate

Variable `z` Type: float

Z coordinate

Methods

Method `get_array3`

```
def get_array3(  
    self  
)
```

Returns the vector as a numpy array

Method `get_array4`

```
def get_array4(  
    self  
)
```

Returns the vector as a numpy array
